

## Process Control & Data Management Systems for

# DataPro Series

## Intelligent Wire and Cable Manufacturing

### The DataPro Advantage:

- Captures measurement data from each gauge in the production process and centralizes this information for end-to-end visibility and management of processes
- Closed-loop feedback control continuously monitors product dimensions and automatically controls the line to optimize your process for efficient, quality manufacturing
- SPC data identifies and improves process trends, as well as enhances your quality documentation to back-up quality claims with customers and ISO auditors
- Available in high-end fully featured, mid-range, and economical process controller/indicator models in 27 customized versions to meet your unique application needs

The DataPro controller series captures real-time product and process data from Beta LaserMike gauges during production and provides visual summaries, reporting, analysis, and efficient control of product processes. DataPro includes a versatile set of I/O capabilities to enhance quality-driven manufacturing. Critical process data is collected at every step, from initial startup through production to the final quality phase. You'll realize significant start-up and in-process savings right at your fingertip and take your manufacturing to the next level to produce superior quality wire and cable products.

# Comprehensive Process Controller and Data Management System

## DataPro 5000

The DataPro 5000 is a high-end, fully featured process controller and data management system. It has an easy-to-use, touch-screen interface that provides an intuitive, color graphical overview of product dimensions and process parameters. DataPro 5000 is designed with various users in mind: operators, supervisors, process engineers, and plant managers. The user interface can be quickly configured to meet your unique informational needs and allows efficient access to data.

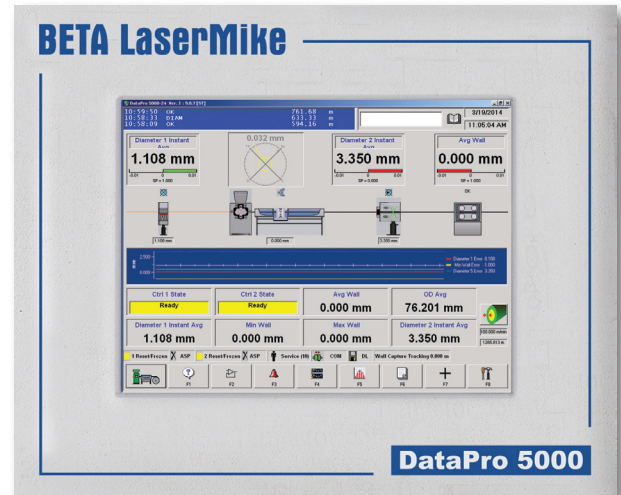

## Easy-To-Use Touch Screen Interface

## Broad Range of Inputs/Outputs (I/O)\*

- 8 Digital I/O (24 VDC)
- 4 Analog I/O ( $\pm 10$  V, 12 bit) including:
  - Analog summing junction control outputs
- 8 Relays including:
  - Contact alarm outputs
  - Contact control outputs
- Ethernet 10/100 Base T
- Serial (RS-232) and USB
- Parallel port
- USB/Network printer port
- VGA output for additional monitor
- Line speed/length measurement input (via Analog, pulse, or differential inputs A/B)

\*The number of inputs/outputs can vary based on application needs. Discuss communication requirements with Beta LaserMike.

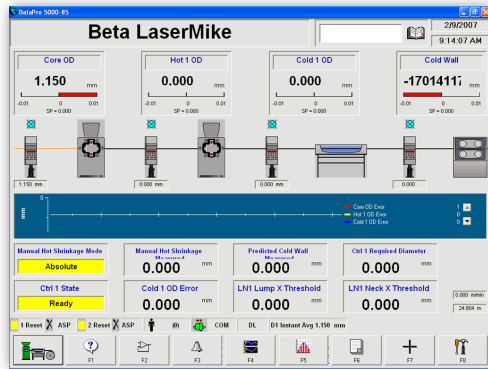

## DataPro 5000 Features:

- Color touch-screen display
- Line overview page
- Closed-loop control (2 control loops, auto set-pointing)
- Alarming for warning and tolerance limits, including alarm history log
- Real-time Trending (configurable trend charts)
- Real-time Statistical Process Control (SPC) with on-screen statistics and charts
- Reporting capabilities including customizable printed or electronic reports (product ID/product lot number/batch reports)
- Data logging (configurable local or network data logging)
- Recipes (unlimited product recipes for quick changeovers)
- Security (10 levels of security for system protection)
- Networking (Ethernet and USB ports allow easy data access)
- Instant support of multiple languages for operation and printing; user-customizable

## Options

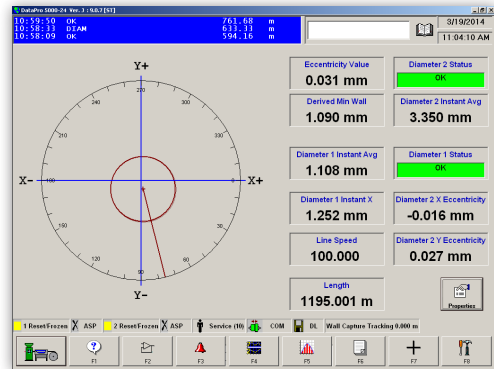

- Industrial enclosure – arm or pedestal mountable
- Industrial remote touch-screen – includes VGA extender and industrial enclosure
- Standard remote touch-screen – includes VGA extender, but does not include enclosure
- Pedestal stand for enclosures – controller industrial enclosure or remote touch screen
- Uninterruptable Power Supply (UPS) – with serial output to shut down controller at power loss

# Real-Time Monitoring of Process and Product Quality Data

**DataPro 5000 Eccentricity View** enables you to accurately monitor the eccentricity of wire and cable conductors during extrusion and insulation processes to reduce start-up time, avoid material give-away/waste, and improve product quality.

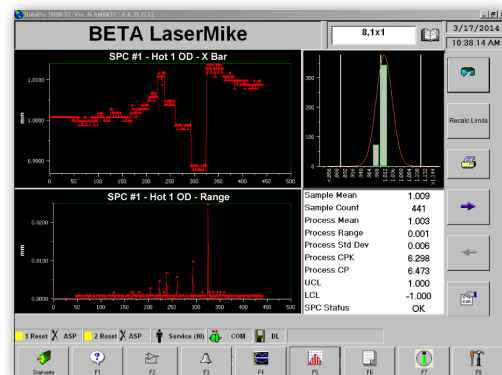

**DataPro 5000 Line Overview Page** provides a complete line overview along with relevant process data. Can be easily customized to meet your unique data set requirements. Dashboard-style view lets you prioritize efforts to continuously enhance the quality of your product and overall process.

**DP5000 Real-Time Trend Charts** allow you to easily select the data set you want to track and record with just the touch of a fingertip.

**DataPro 5000 SPC Data Analysis** feature collects and displays process data on 8 individual channels. Customized SPC calculations help you to improve product trends and the effectiveness of your quality system documentation for customer and auditor compliance efforts.

**DP5000 Reporting** feature lets you create and print custom error and SPC reports with graphical distribution to document product and process quality. Reports can be triggered manually or automatically, for example, via a production event and stored electronically or printed to hard copy. You can also generate spool reports with critical cable measurement data.

```

15:20:01    1.030    0.128
15:20:31    1.029    0.127
```

**DP5000 Data Logging** feature allows you to record and analyze process data without having to stand near and observe the extrusion line. Data can be logged manually or automatically to a local drive at the DataPro 5000 or to a network drive away from the plant floor. The time interval can be adjusted from 1 second to 10 minutes.

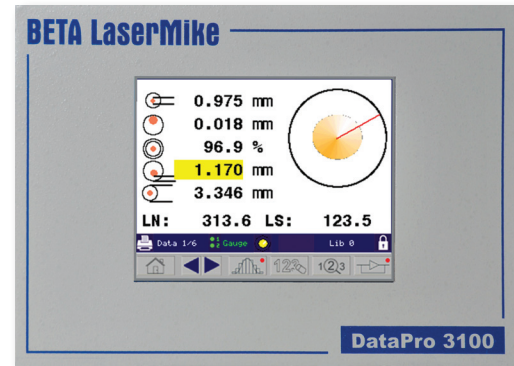

# High-Quality, Mid-Range Process Controller and Data Management System

## DataPro 3100

The DataPro 3100 is a mid-range process controller with integrated data management system. It has a bright, color touch-screen display for easy viewing on the production line. It is simple to use, yet offers power control capabilities in a compact design.

### DataPro 3100 Features:

- Color TFT touch-screen display
- Provides power and communication for up to two gauges
- Magnified display for easy viewing
- Closed-loop control (1 control loop)
- Alarming for warning and tolerance limits
- Statistical Process Control (SPC) with on-screen statistics
- Reporting (fixed hard-copy reports)
- Recipes (100 product recipes for quick changeovers)
- Security (3 levels of security for system protection)
- Instant support of multiple languages for operation and printing

### Variety of Inputs/Outputs (I/O)

- 5 Digital I/O (24 VDC)
- 2 Analog I/O (+/-10 V, 12 bit):
  - Analog summing junction control outputs
  - Programmable Analog output
- 4 Relays including:
  - Contact alarm outputs
  - Contact control outputs
- Open collector stepper motor control outputs
- Serial (RS-232) port
- USB printer port (True Type font)
- Ethernet configuration & Data I/O
- Line speed/length measurement input (via Analog, pulse, or differential inputs A/B)

### Option

- Industrial enclosure—pedestal mountable and 48.26 mm (19 in.) rack adapters

---

# Economical Process Controller and Indicator

---

## DataPro 1000

The DataPro 1000 is an economical process controller, as well as an indicator for diameter control operations. It offers a self-tuning controller display to achieve the best results when capturing product diameter measurements. The DataPro 1000 offers the best of both worlds when looking for a cost effective but powerful package.

### DataPro 1000 Features:

- Ultra-bright, multi-line vacuum fluorescent display
- Magnified display for easy viewing
- Supports 1 diameter gauge
- Closed-loop control (1 control loop)
- Alarming for warning and tolerance limits
- Statistical Process Control (SPC) with on-screen statistics
- Programmable analog output
- Ethernet data transmission
- Reporting (fixed hard-copy reports)
- USB printer port
- Instant support of multiple languages (English, Spanish, German, and Portuguese)
- Security (two levels)

### Array of Inputs/Outputs (I/O):

- 5 Digital I/O (24 VDC)
- 2 Analog I/O (+/-10 V, 12 bit):
  - Analog summing junction control output
  - Programmable Analog output
- 4 Relays including:
  - Contact alarm outputs
  - Contact control outputs
- Open collector stepper motor control outputs
- Serial (RS-232) port
- USB printer port (True Type font)
- Line speed/length measurement input (via Analog, pulse, or differential inputs A/B)
- Ethernet configuration & Data I/O

#### Option

- Industrial enclosure—pedestal mountable and 48.26 mm (19 in.) rack adapters

# Integration with In-Process Dimensional Measurement Products

DataPro controllers are designed for easy and flexible integration with Beta LaserMike in-process dimensional gauges on pipe and tube extrusion lines, such as Preheaters, AccuScan diameter and ovality gauges, CenterScan eccentricity gauges, CapScan capacitance gauge, LaserSpeed length and speed gauges, LN lump and neckdown detectors, and Spark Testers. DataPro can also be integrated with other devices and systems including the extruder, puller, and air and vacuum control devices. Alarm lights and printers can also be connected. Beta LaserMike's DataPro controllers are also available in 27 customized versions to meet your unique application needs.

## Primary Cable (Solid Insulation)

## Coaxial & Primary Cable (Foamed Insulation)

## Tight Buffer & Loose Tube Fiber (Dimensional)

## Jacketed Cable

# DataPro Controller Models

DataPro Controller Models			
Feature	DataPro 5000	DataPro 3100	DataPro 1000
<b>Display</b>	38.1 cm (15 in.) TFT touch screen	14.5 cm (5.7 in.) TFT touch screen	10.4 cm (4.1 in.) Vacuum fluorescent
<b>Gauge support</b>	AccuScan 4000/5000 UltraScan Shaped Products (i.e., sector, overhead) LaserSpeed Lump & Neck CenterScan CapScan Preheater Spark Testers	AccuScan 4000/5000 UltraScan Shaped Products (i.e., sector, overhead) LaserSpeed	AccuScan 4000/5000 LaserSpeed Shaped Products (i.e., sector, overhead)
<b>Max gauges</b>	10	2	1
<b>Applications</b>	Inner/Outer Diameter Wall & Concentricity Length & Speed Fault Detection Eccentricity Capacitance Preheating	Inner/Outer Diameter Wall & Concentricity Length & Speed Eccentricity	Outer Diameter Length & Speed
<b>Cross-section display</b>	Yes (multi-layer possible)	Yes (1 layer only)	No

## Serving Your Measurement & Control Needs with World-Class Solutions

---

### About Beta LaserMike

Beta LaserMike provides integrated process control solutions using a wide range of non-contact measurement technologies designed to improve product quality and reduce manufacturing costs. These solutions provide in-process dimensional monitoring, control, and sample/part inspection of products such as wire and cable, fiber optics, metals, rubber and plastic, flat rolled goods, tube and pipe, and other manufactured goods. Every system is backed by Beta LaserMike's world-class service and support organization. With offices around the globe, we're committed to serving your unique measurement application needs.
