

## Off-Line Diameter & Ovality Measurement System

# BenchMike 283 Series

for Wire and Cable Samples

### The BenchMike Advantage:

#### Accuracy

- Patented optical design and edge-sensing electronics provide high-precision measurements
- Auto-compensation features maintain accuracy throughout entire measurement range and adjust for thermal expansion outside laboratory environments

#### Reliability

- Non-contact measurement technique provides the same level of accuracy regardless of operator
- Tolerance checking quickly alerts the operator of out-of-tolerance conditions
- Mounting fixtures from Beta LaserMike ensure the test piece is always properly presented to the gauge

#### Ease-of use

- A touch-screen interface provides simple operation and setup
- A library list stores product "recipes" and allows the operator to switch products quickly and easily
- A range of input/output (I/O) ports allow flexible integration with other devices

#### The industry's most accurate, reliable, and easiest-to-use gauging system

The BenchMike 283 series from Beta LaserMike provides fast and accurate measurements of manufactured parts or cut samples of extruded parts. Used either in a quality control (QC) laboratory or on the plant floor, BenchMike gives operators a simple and repeatable system for measuring parts and immediately knowing whether they meet specifications within tolerances of less than 1 µm (0.00004 in.).

Laser technology allows BenchMike to measure multiple product dimensions without touching, deforming, scratching, or damaging the part. Unlike other micrometers and mechanical indicators that can give errors due to poor zero setting, end play, or calibration, or are sensitive to user input, BenchMike provides repeatable measurements regardless of the operator. With BenchMike, there is nothing to adjust between part measurements and nothing to wear out.

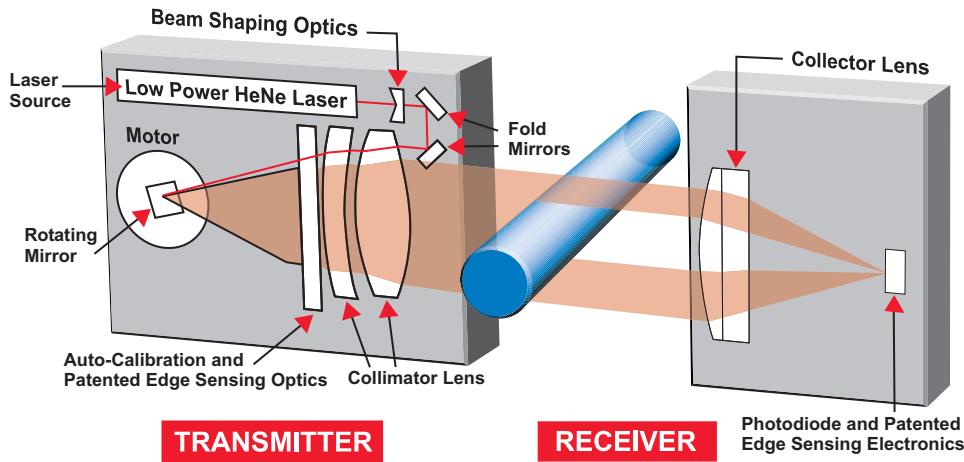

**BETA LaserMike**  
Measured by Commitment

## Innovative Technology

Beta LaserMike operates on the cutting edge of measurement technology. In 1973, we patented our innovative laser measurement technique (the first of its kind in the world), and today we continue to improve our designs by making them easier to use while maintaining precision accuracy.

Each BenchMike contains a transmitter, receiver, processor electronics, and a touch-screen display in an integrated package. A thin band of high-speed scanning laser light is projected from the transmitter by a low-power laser source, a scanning mirror, and a series of optics.

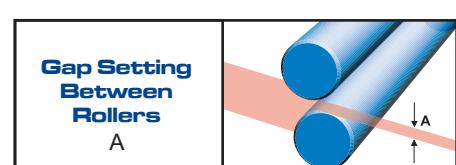

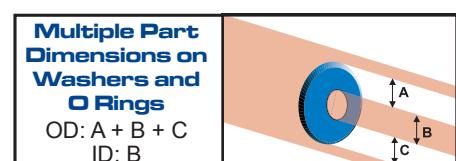

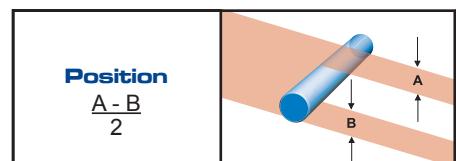

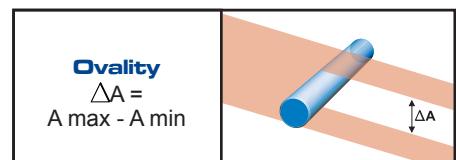

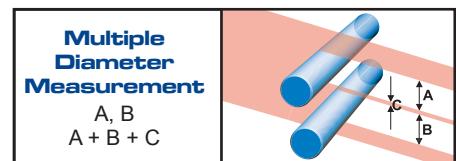

The receiver houses a collector optic, photodiode, and preamplifier. Through our patented edge-sensing process, the laser light signal entering the receiver is used to calculate the distances between the edges of the product. Dimensional data is instantly displayed and can be transmitted to a computer for further processing.

### No Field Calibration Required

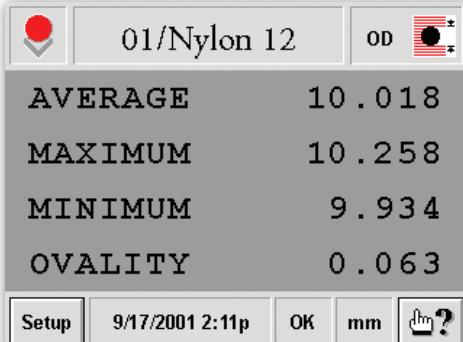

BenchMike uses a combination of built-in auto-calibration and dual-differentiation technology providing unmatched accuracy without field calibration. Never has it been easier to incorporate precision measurement on the production line, and since every system includes a programmable RS-232C interface, collecting and sending data to your storage and control system is almost effortless.

Contact your local Beta LaserMike representative and start seeing the benefits of improved quality, increased production yield, and decreased material cost on the bottom line today.

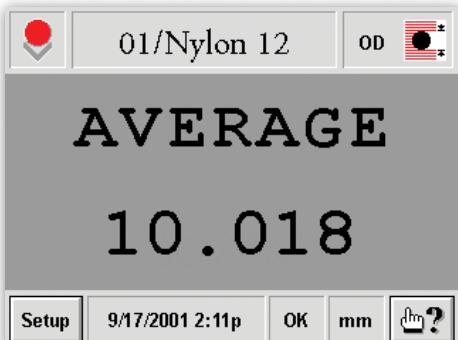

# Simple Touch-Screen Interface Lets You Easily Access BenchMike Features and Functions

BenchMike's touch-screen graphical user interface (GUI) gives operators a quick and simple means of viewing dimensional measurements, accessing gauge and system information, and changing parts. Screen layouts are customized for the needs of the user or application and the "look and feel" is simple for any user familiar with Windows.

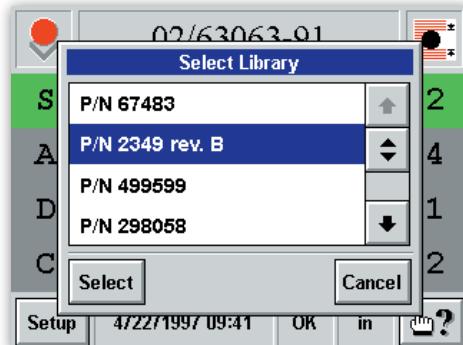

## Data Display

BenchMike has advanced display capabilities allowing you to display measurement data, access menus to configure BenchMike, and display general information such as presence or absence of error conditions.

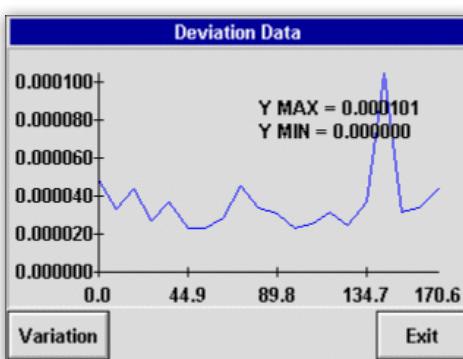

## Magnified Display

Magnify measurement items on the screen for visibility from a distance.

## Library (Part) Selection

Use BenchMike libraries to store and recall how the measurements are to be taken, and manage other system setup information via separate libraries. By defining libraries for each product or for different fixtures, you can shorten set-up times for various parts or applications.

Oversize Samples	0
Total Number of Samples	3

## Range of Reporting Capabilities

Easily generate Sample, Batch, and Fixture reports. Use the Sample Report when taking a single measurement of multiple parts. Use the Batch report to summarize statistical results for all measured parts. Use the Fixture reports to generate similar sample and batch details when using automated part-positioning fixtures.

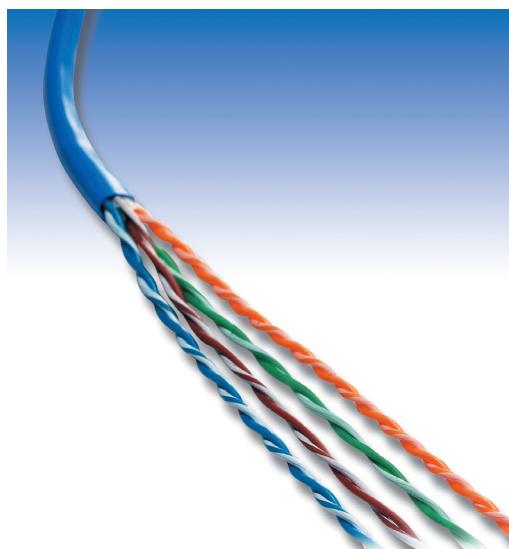

## Rotational Deviation/Variation Graphs

Create Deviation and Variation graphs when using an intelligent fixture. The graphs show the deviation from nominal at each position and size variation between positions.

## Solutions for Wire & Cable Applications

The BenchMike 283 series from Beta LaserMike is the ideal solution for fast, simple, and accurate measurements of cut samples of extruded wire and cable. BenchMike is used worldwide on extrusion plant floors and quality control (QC) laboratories to give operators and technicians immediate feedback of product dimensions.

Wire and cable manufacturers must ensure that the dimensions of their products are maintained within tight specifications to ensure the quality of the product and the profitability of the company. To satisfy this need, the BenchMike utilizes the latest in laser gauging technology to provide high-precision OD measurements of wire and cable within specifications of less than 1µm (0.00004 in.).

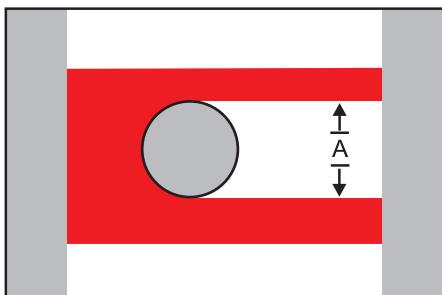

### Diameter & Ovality Measurement

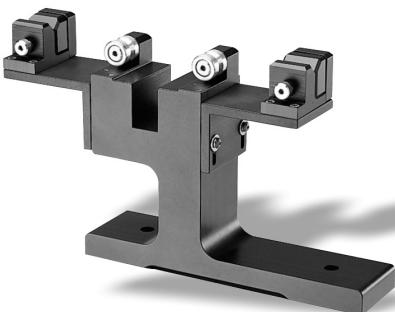

#### << Auto-Rotating Chuck Fixture

For precision OD measurements, simply place your product in the rotary chuck fixture and BenchMike will instantly measure it. Using BenchMike, an operator can measure dozens of parts per minute and with a much higher level of accuracy than any other method available for sample inspection. And with the use of laser technology, the measurements will be repeatable from one operator to another.

#### << Ultra Fine Wire V-Block

Ultra Fine Wire V-Block is designed for ultra fine wire or other material that must be held under tension for accurate measurement. Holds wires in the range of 0.025 to 0.254 mm (0.001 to 0.010 in.). It is used with Spot Reducer Option.

# Specifications

## Measurement Specifications

	Model 283-10	Model 283-20
<b>Measurement Range*</b>	0.100 to 25.4 mm (0.004 to 1.0 in.)	0.254 to 50 mm (0.010 to 2.0 in.)
<b>Repeatability</b>	±0.25 µm (0.000010 in.)	±0.5 µm (0.000020 in.)
<b>Linearity</b>	±0.9 µm (±0.000036 in.)	±1.5 µm (±0.000060 in.)
<b>Measurement Area Depth Of Field</b>	±.75 x 25 mm (±0.030 x 1.0 in.)	±1.5 x 50 mm (±0.060 x 2.0 in.)
<b>Laser Beam Velocity</b>	50 m/sec. (2,000 in./sec.)	100 m/sec. (4,000 in./sec.)
<b>Temperature Coefficient</b>	<0.2 µm/°C (<0.000004 in./°F)	
<b>Calibration</b>	Factory calibrated	
<b>Scan Rate</b>	100/sec	

\*See other sizes in the Options section.

## General Specifications

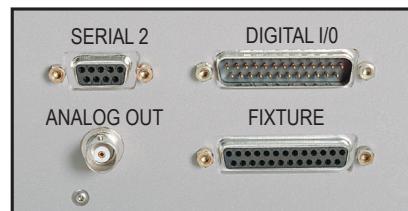

<b>Operating Temperature</b>	7° to 36° C (45° to 97° F) at < 90% relative humidity
<b>Storage Temperature</b>	-20° to 60° C (-4° to 140° F)
<b>Dimensions (H x W x D)</b>	254 x 635 x 228 mm (10 x 25 x 9 in.)
<b>Weight</b>	17 kg (38 lb.)
<b>LaserSource</b>	HeNe gas laser; <1 mW output
<b>Display</b>	320 x 240 liquid crystal display; 256 colors
<b>Power Requirements</b>	100 to 240 volts AC (+5% to -10%), 50/60 Hz (+/-2 Hz)100 watts total power

## Input/Output

The BenchMike provides a variety of input/output connectors to allow flexible integration with other devices.

The available BenchMike I/O includes:

- Serial ports to link with computers or data gathering devices
- Parallel port to connect to printers for printed reports
- Digital I/O port for connection of alarm outputs to indicate out-of-tolerance conditions and other errors, as well as digital inputs to activate functions remotely
- Analog output BNC port for sending information to chart recorders or PLCs
- Fixture port for connection to intelligent fixtures capable of moving and rotating the test pieces
- Scan output BNC port for diagnostic access to the laser scan signal

# Modular Fixtures

## Ready-To-Mount Flexibility

Beta LaserMike offers an extensive line of ready-to-mount modular fixtures from simple manual fixtures to fully automatic and intelligent fixtures. These fixtures hold workpieces properly and effectively for any gauging need. Simply attach these easy-to-install fixtures to your BenchMike for precise, reliable measurements without calibration.

We provide a full line of heavy-duty fixtures to measure small and large parts, along with automatic motorized fixtures for part translation and rotation. For your custom needs, the Beta LaserMike Special Engineering group excels at developing fixtures for special applications.

Fixture	Description	Part #
	<b>V-Block:</b> General Purpose, Fixed  Used for measuring parts positioned on their outside diameter. Holds diameters from 0.38 to 45.72 mm (0.015 to 1.800 in.)	83855 (283-10) 83854 (283-20)
	<b>V-Block:</b> General Purpose, Full-Range, Adjustable  Enables part centering and measurement over the full measuring range of the BenchMike Series. Holds diameters from 0.38 to 50.4 mm (0.015 to 2.0 in.).	83976
	<b>V-Block:</b> Adjustable  Supports parts that must be held on their outside diameters. Must be mounted on a slide. Holds wire diameters up to 45 mm (1.8 in.).	83609
	<b>V-Block:</b> Fine Wire Adjustable  Designed for fine wire or other material that must be centered for best measurement accuracy. Holds wire diameters from 0.025 to 10.16 mm (0.001 to 0.400 in.).	84260
	<b>V-Block:</b> Ultra Fine Wire  Designed for ultra fine wire or other material that must be held under tension for accurate measurement. Holds wire diameters from 0.025 to 0.254 mm (0.001 to 0.010 in.). Used with Spot Reducer Option.	84252
	<b>Slide:</b> Universal Manual  Used to linearly position parts by hand. Available in 457, 635 or 829 mm (18, 25 or 32 in.) lengths. Slide travel is 305, 483, or 660 mm (12, 19, or 26 in.).	83610 (457 mm) 83611 (635 mm) 83618 (829 mm)
	<b>Slide:</b> Digital Readout  Used to linearly position parts to predetermined positions for measurement, and/or measure the distance between two points on a part. Available in 457, 635 or 829 mm (18, 25 or 32 in.) lengths. Slide travel is 305, 483, or 660 mm (12, 19, or 26 in.).	83616 (457 mm) 83617 (635 mm) 83863 (829 mm)
	<b>Chuck:</b> Auto-Rotating  Motorized rotation of shafts or wires to detect variation in diameter around the circumference. Keyless precision chuck holds diameters 0.76 to 12.7 mm (0.030 to 0.50 in.).	84015
	<b>Chuck:</b> Zero-Rotating  Enables the automatic measurement of diameter variation from 75 µm to 3 mm (0.003 to 0.120 in.).	84007
	<b>Chuck:</b> 3.18 mm Rotating  Enables the automatic measurement of diameter variation from 0.3 to 3.18 mm (0.012 to 0.125 in.).	84005
	<b>Chuck:</b> 38 mm Rotating  Enables the automatic measurement of diameter variation from 1.5 to 38 mm (0.0625 to 1.5 in.)	84002
	<b>Wire Auto-Rotating</b>  Designed for the automatic measurement of very small diameter samples from 0.075 to 1.27 mm (0.003 to 0.050 in.).	84274 (English) 84495 (Metric)
	<b>Fine Wire Heanium V-Guide</b>  Enables the measurement of small samples that will not lay straight in a V-block. Holds wire diameters from 0.076 to 3.175 mm (0.003 to 0.125 in.).	83883

# Options

Special accessories are available to address certain non-standard applications or data needs:

## ■ Small Spot Size Option

Special measurement range from 25 µm (0.001 in.) to 10 mm (0.4 in.) (factory installed option)

## ■ Digital I/O Interface

High-current open collector outputs for gauge and measurement status. A footswitch accessory lets the user activate the gauge's measure function or initiate single measurements.

## ■ Transparent Object Measurement

Enables the BenchMike to measure the diameter of transparent material, such as clear plastic products such as glass tubes and rods.

## Other Beta LaserMike Measurement and Control Solutions

In addition to our BenchMike off-line gauging system, Beta LaserMike offers a complete portfolio of measurement and control solutions for on-line production applications. Our solutions enable manufacturers to realize a number of performance and production benefits, such as improved product quality, enhanced process reliability, increased productivity, and reduced manufacturing costs.

## Serving Your Measurement & Control Needs with World-Class Solutions

### About Beta LaserMike

Beta LaserMike provides integrated process control solutions using a wide range of non-contact measurement technologies designed to improve product quality and reduce manufacturing costs. These solutions provide in-process dimensional monitoring, control, and sample/part inspection of products such as wire and cable, fiber optics, metals, rubber and plastic, flat rolled goods, pipe and tube, and other manufactured goods. Every system is backed by Beta LaserMike's world-class service and support organization. With offices around the globe, we're committed to serving your unique measurement application needs.
